Women In Space

An Exhibition on WOMEN IN SPACE has been presented by AS.IT.AF. during the Commemoration of the 50 Years from the flight of Valentina Tereshkova, at the Politechnic of Turin. Four Exhibits were shown by ASITAF Members to celebrate the Soviet Mission of 1963 and the 58 Women who flew in space so far.

Particular attractive for general public was the collective exhibit prepared by Umberto Cavallaro, Andreina Damiani, Pietro Della Maddalena, Renzo Monateri, Annibale Rega and Lodovico Sacchi with the graphical design of Alec Bartos who strongly supported the project.

The frames have been on show for one week, during the IAA Symposium at the Polythecnic of Turin.
