

“WOMEN IN SPACE” at Terracina

The exhibition “WOMEN IN SPACE” was organized at the BIANCHINI Technical High-School of Terracina (near Rome) by the ASITAF Member **Pietro Pantanella**.

During the opening Conference he illustrated the Expedition-42 of Samantha Cristoforetti and provided an overview on the 60 female-space-explorers who have flown in space so far.

The exhibition was open from 2 to 14 February 2015 and was visited by 800 students and their families.
